

BLANTONE MUSIC CD GRAPHICS FORM

When you choose Blantone Music to design your project, you put your image in the competent hands of our graphic designers. We review the materials and ideas you submit and work from there to create a package design. We'll then forward proofs for your approval - free. We don't go to print until you're satisfied.

If you prefer to supply your design, we'll check your files to make sure your crop marks, folds, bleeds, and other specs are perfect. If we find a minor error, we'll fix it - free. After we're done, we'll forward you a proof to make sure everything is to your liking before we go to print. No matter what, you are in complete control of the process.

At Blantone Music, we know that even when it's your design, it's our reputation. To help make your project perfect, please follow the following guidelines:

If you supply a PC disk or any design work that is not in an acceptable Blantone Music format, add 3 days to your package price and turnaround.

Disk Supplied

Blantone Music prefers the following PC-compatible material:

- ✓ USB flash drive
- ✓ CD-R
- ✓ DVD+/-R
- ✓ E-mail

Our supported file platforms (for PC) are:

MS Word & related

Adobe PhotoShop

Adobe Illustrator

Microvision SureThing

Jpeg

TIFF

EPS

png

bitmaps

We do upgrade our hardware and software, so if you want to use a software program or supply files on media other than those listed, call us to check on availability. 828-724-1500

We accept Photoshop files for your images, **but we strongly advise that you do not prepare your entire layout in Photoshop**, as the resolution that is ideal for photographs will cause your type to appear somewhat jagged. It also limits our ability to make corrections or edit your document if an error is discovered. At this time, we cannot accept Microsoft Publisher because it is not set up for color separations, a necessary function for high-end printing.
